U.S. EQUITY

Volatility returned in the 1st quarter of 2018, with the Dow and S&P 500 both ending the quarter down—a first since the 3rd quarter of 2015. After starting strong on the back of solid earnings and tax reform, U.S. equities faltered in the second half over concerns about a more aggressive global trade policy and uncertainty over the pace of interest rate hikes. The S&P 500 (-0.8%) experienced a marked increase in volatility, with six days of movements greater than 2% during the quarter (versus none in 2017). Volatility as measured by the VIX index reached a quarterly high of 116% on Feb. 5 when the market sank 4%.

Small Cap Outperforms Large Cap

(Russell 1000: -0.7%; Russell 2000: -0.1%)

- The prospect of a trade war with China weighed on large caps since many of these companies are exposed to international markets (S&P 500 aggregate is ~40%) while small caps were less impacted as they tend to have a higher proportion of their revenue exposure from domestic markets (~80-90%) and benefit from a more protectionist policy.
- In mid-March, mega-cap Tech firms saw their stock prices drop in the wake of Facebook’s Cambridge Analytica scandal, leading to declining trust for the industry and negative investor sentiment. The market began pricing in the potential for more regulatory oversight for these internet companies. Performance for the “FANGs” split during the quarter, with Facebook and Google down while Netflix and Amazon advanced.

Value Continued to Trail Growth

(Russell 1000 Growth: +1.4%; Russell 1000 Value: -2.8%)

- Value trailed as the prospect of increased inflation and accelerating interest rates weighed on interest rate-sensitive sectors (Financials: -1.0%, Real Estate: -5.0%, Utilities: -3.3%).
- Energy (-5.9%) also took a hit despite a more promising outlook for the sector as the Saudis agreed to continued oil production cuts into 2019; performance for 1Q18 was impacted by Exxon Mobil and Chevron missing 4Q17 earnings expectations.

U.S. Equity: Quarterly Returns

U.S. Equity: One-Year Returns

Russell Sector Returns, Quarter ended March 31, 2018

Sources: FTSE Russell, Standard & Poor’s

Defensive Sectors Underperformed Cyclical

- Despite the increased volatility and price drop in the broader index, defensive sectors underperformed cyclicals due in large part to the rising interest rate environment. Technology (+3.5%) and Consumer Discretionary (+3.1%) were the only two sectors that posted positive returns.
- Telecommunications (-7.5%) and Staples (-7.1%) were the two worst-performing sectors.

NON-U.S./GLOBAL EQUITY

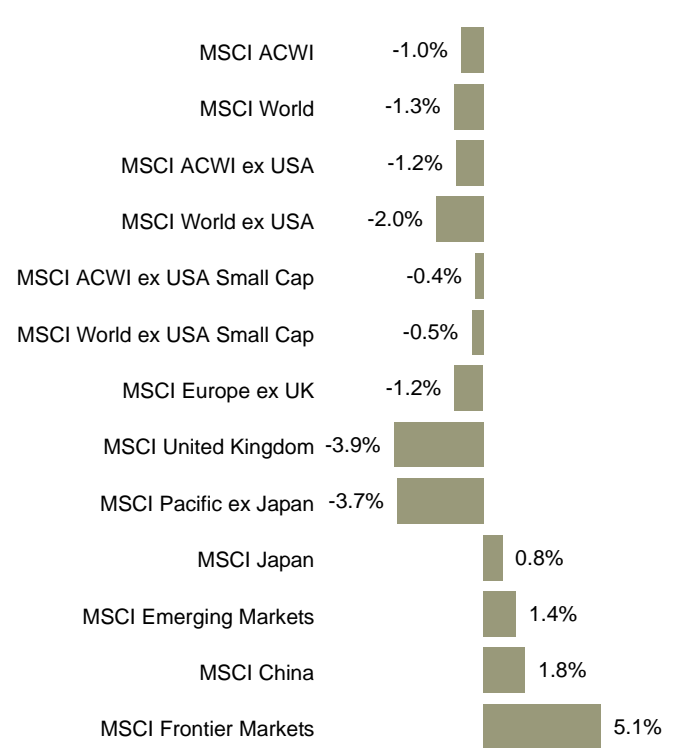

Non-U.S. developed equity underperformed U.S. as non-U.S. equity markets were spooked by geopolitical tension and market volatility along with fears of rising U.S. interest rates and inflation despite positive economic data. Emerging markets continued to outpace developed, fueled by a soft dollar and synchronized global growth; however, fears of inflation and its implication on the trajectory of U.S. monetary policy—as well as a potential trade war with China—weighed on the market. Developed non-U.S. small cap outperformed large cap given the risk-on market environment spurred by synchronized global growth.

Global/Non-U.S. Developed

(MSCI EAFE: -1.5%; MSCI Europe: -2.0%; MSCI Japan: +0.8%; MSCI World ex USA: -2.0%)

- The dollar lost ground to the euro and yen, which buoyed returns for their respective regions.
- Euro-zone recovery continued, with GDP growth of 2.7% in the recent quarter year-over-year driving the currency up 2%—and the pound by nearly 4%—relative to the dollar.
- Japan’s economy grew by 1.6% fueled by infrastructure development ahead of the 2020 Olympics, enabling the yen to surge by 6% relative to the dollar.
- The only sectors that posted positive returns were Consumer Discretionary, Tech, and Utilities.
- Positive earnings supported the Tech sector (top performer), and Utilities benefited as investors fled to safety amid market volatility and yield curve flattening in March.
- Telecom struggled as competition for wireless services within the euro-zone eroded profitability, and Staples was notably challenged due to fears of interest rate normalization and the prospect of beleaguered growth.
- Growth outpaced value and earnings growth and quality factors were in favor as markets were jittery in light of the aforementioned looming risks. As such, high beta cyclical sectors and factors struggled.

Global Equity: Quarterly Returns

Global Equity: One-Year Returns

Source: MSCI

Emerging Markets (MSCI EM: +1.4%)

- Brazil and Russia were among the best performers due to climbing oil prices and improving economic conditions.
- China continued to thrive despite U.S.-China trade tension and a slowdown for Chinese Tech companies; China's supply-side reforms are kicking in and economic growth in retail and home sales exceeded expectations, driving up returns for the Financials and Real Estate sectors.
- Although India announced better-than-expected GDP growth of 7.2%, the country notably lagged due to poor market sentiment surrounding asset-quality issues at large state-owned banks and relative valuations of Indian equities.
- Energy was the best performer supported by rising oil prices; conversely, Consumer Discretionary was the worst sector performer, weighed down by India.
- Value and sentiment factors were in favor as the economic recovery story gained traction and momentum; however, quality factors also added value given the mid-cycle of the recovery.

International Small Cap (MSCI World ex USA Small Cap: -0.5%; MSCI EM Small Cap: +0.2%)

- Developed non-U.S. small cap outperformed large cap given the risk-on market environment spurred by synchronized global growth, although within Emerging Markets, small cap lagged large cap.
- Growth was favored in both developed and emerging market small cap as growth-oriented sectors such as Health Care and Consumer Staples outperformed cyclical sectors.

FIXED INCOME

Going into 2018, U.S. markets continued to rally higher due to solid economic data, passage of the U.S. tax reform, and rising expectations for corporate earnings growth. However, optimism quickly vanished as investors turned their focus to rising wage pressures, policy uncertainties surrounding the new incoming Fed Chair Jerome Powell, and escalating trade tensions between the U.S. and China. The 10-year U.S. Treasury yield steadily rose to nearly 3% from a low of 2.41% at the start of the year, before declining to close the quarter at 2.74%. Corporate risk premia similarly tightened then widened for both investment grade and high yield corporates. Strong investor demand and fewer new corporate issuances compared to the same period last year helped offset some of the declines from rising rates and increased spread volatility during the quarter.

The Bloomberg Barclays US Aggregate Bond Index returned -1.5%

- Volatility picked up across risk assets as geopolitical uncertainties took center stage; market expectations reflect the possibility of four rate hikes, up from three at the end of 2017.
- Interest rates rose ~30bps across the U.S. Treasury yield curve.
- The 10-year U.S. Treasury yield rose from 2.41% to 2.74%.

U.S. Fixed Income: Quarterly Returns

U.S. Fixed Income: One-Year Returns

U.S. Treasury Yield Curves

Sources: Bloomberg, Bloomberg Barclays, Credit Suisse

Investment grade corporates returned -2.3% and underperformed the Aggregate Index

- Investors were fairly sanguine as they reassessed fairly healthy balance sheets juxtaposed with fair/rich valuations.
- New issuance was down 13% when compared to a similar time period a year ago, yet demand remained strong with 2-3x oversubscriptions.

High yield corporates returned -0.9% and outperformed the US Aggregate Index

- Corporate fundamentals remained healthy as earnings growth supported debt coverage.
- Default rates remained benign because many companies had already reorganized debt in 2016.
- Approx. 75% of new issuance proceeds were used for refinancing.
- Valuations remained near historical highs.

Bank loans returned +1.4% and outperformed the Aggregate.

- Healthy balance sheets, strong demand for CLO formation, and higher short-term interest rates bode well for the sector this quarter.
- Demand from CLO formation continued to lead to interest in bank loans.

EMD returned +4.4% as returns were positive for most countries in local currency terms.

- Mexico, 10% by weight of the Index, returned 11% due mostly to strong appreciation of the Mexican peso on speculation that an agreement would be reached on NAFTA.
- South Africa, also 10% of the Index, returned 13% from the rand hitting a multi-year high after scandal-ridden President Zuma resigned. Falling rates also supported performance.

Investment Manager Asset Allocation

The table below contrasts the distribution of assets across the Fund's investment managers as of March 31, 2018, with the distribution as of December 31, 2017. The change in asset distribution is broken down into the dollar change due to Net New Investment and the dollar change due to Investment Return.

Asset Distribution Across Investment Managers

	March 31, 2018			December 31, 2017		
	Market Value	Weight	Net New Inv.	Inv. Return	Market Value	Weight

Total Fund

Total Fund vs Target Risk Analysis

Risk Analysis

The graphs below analyze the performance and risk of the fund relative to the appropriate target mix. This relative performance is compared to a peer group of funds wherein each member fund is measured against its own target mix. The first scatter chart illustrates the relationship, called Excess Return Ratio, between excess return and tracking error relative to the target. The second scatter chart displays the relationship, sometimes called Information Ratio, between alpha (market-risk or "beta" adjusted return) and residual risk (non-market or "unsystematic" risk). The third chart shows tracking error patterns over time compared to the range of tracking error patterns for the peer group. The last two charts show the ranking of the fund's risk statistics versus the peer group.

Quarterly Total Fund Relative Attribution - March 31, 2018

The following analysis approaches Total Fund Attribution from the perspective of relative return. Relative return attribution separates and quantifies the sources of total fund excess return relative to its target. This excess return is separated into two relative attribution effects: Asset Allocation Effect and Manager Selection Effect. The Asset Allocation Effect represents the excess return due to the actual total fund asset allocation differing from the target asset allocation. Manager Selection Effect represents the total fund impact of the individual managers excess returns relative to their benchmarks.

Asset Class Under or Overweighting

Actual vs Target Returns

Cumulative Total Fund Relative Attribution - March 31, 2018

The charts below accumulate the Total Fund Attribution Analysis (shown earlier) over multiple periods to examine the cumulative sources of excess total fund performance relative to target. These cumulative results quantify the longer-term sources of total fund excess return relative to target by asset class. These relative attribution effects separate the cumulative sources of total fund excess return into Asset Allocation Effect and Manager Selection Effect.

One Year Relative Attribution Effects

Cumulative Relative Attribution Effects

One Year Relative Attribution Effects

Asset Class	Effective Actual Weight	Effective Target Weight	Actual Return	Target Return	Manager Effect	Asset Allocation	Total Relative Return

Investment Manager Returns and Peer Group Rankings

The table below details the rates of return and peer group rankings for the Fund's investment managers over various time periods ended March 31, 2018. Negative returns are shown in red, positive returns in black. Returns for one year or greater are annualized. The first set of returns for each asset class represents the composite returns for all the fund's accounts for that asset class.

Investment Manager Returns

The table below details the rates of return for the Fund's investment managers over various time periods ended March 31, 2018. Negative returns are shown in red, positive returns in black. Returns for one year or greater are annualized. The first set of returns for each asset class represents the composite returns for all the fund's accounts for that asset class.

Asset Class Rankings

The charts below show the rankings of each asset class component of the Total Fund relative to appropriate comparative databases. In the upper right corner of each graph is the weighted average of the rankings across the different asset classes. The weights of the fund's actual asset allocation are used to make this calculation. The weighted average ranking can be viewed as a measure of the fund's overall success in picking managers and structuring asset classes.

New Research from Callan's Experts

The Callan Periodic Table of Investment Returns | We are pleased to offer both our Classic Periodic Table, depicting annual returns for 10 asset classes ranked from best to worst performance for each calendar year,

and our Collection, offering 10 additional versions, including real estate indices, hedge fund strategy indices, and key indices ranked relative to inflation.

Callan's 2018-2027 Capital Market Projections | Callan develops long-term capital market projections at the start of each year, detailing our expectations for return, volatility, and correlation for broad asset classes. These projections represent our best thinking regarding a longer-term outlook and are critical for strategic planning as our investor clients set investment expectations over five-year, ten-year, and longer time horizons.

How Callan Categorizes Multi-Asset Class Strategies | In the wake of the Global Financial Crisis, a new generation of multi-asset class (MAC) products emerged that emphasized risk management and expanded their toolkits to include shorting and derivatives.

Callan groups these "outcome-oriented" MACs into four broad categories: Risk Parity, Risk Premia, Absolute Return, and Long Biased.

Treasuries for the Long Run | Callan's James Van Heuit analyzed whether long-term Treasuries can serve as an effective hedge against equity losses. He concluded that long-term Treasuries have a mixed record of offsetting equity risk. The potential protection offered by long-term Treasuries comes with the risk of underperformance over some time periods. Other types of bonds, he found, may offer less protection, but also have less volatility.

2018 DC Trends Survey | Callan's 11th Annual DC Trends Survey from our Defined Contribution Group highlights plan sponsors' key themes from 2017 and expectations for 2018.

Periodicals

Hedge Fund Monitor, 1st Quarter 2018 | Jim McKee explains Form ADV changes and how to use them to evaluate advisers.

DC Observer, 1st Quarter 2018 | Non-qualified deferred compensation plans (NQDCs) may look and sound like qualified defined contribution (DC) plans, but the two are actually quite different. This quarter's commentary explores approaches to designing the NQDC plan investment menu as well as some of the considerations around informally funding the liabilities.

Active vs. Passive Report, 4th Quarter 2017 | This series of charts maps active managers alongside relevant benchmarks over the last two decades.

Market Pulse Flipbook, 4th Quarter 2017 | A quarterly market reference guide covering investment and fund sponsor trends in the U.S. economy, U.S. and non-U.S. equities and fixed income, alternatives, and defined contribution.

Capital Market Review, 4th Quarter 2017 | This quarterly publication provides analysis and a broad overview of the economy and public and private market activity each quarter across a wide range of asset classes.

Private Markets Trends, Winter 2018 | This newsletter offers the latest data on activity in private equity fundraising, buyouts, venture capital, and returns for this asset class.

Events

Miss out on a Callan conference or workshop? Event summaries and speakers' presentations are available on our website: www.callan.com/library/

Callan's June **Regional Workshops** will be held on June 12 in San Francisco and June 13 in Denver. Please visit our Event page on our website (<https://www.callan.com/events/>) for additional information on these workshops.

We've added on-demand webinars to our online research library. Access our library of pre-recorded webinars on specific investment-related topics at www.callan.com/ondemandwebinar/.

For more information about events, please contact Barb Gerraty: 415.274.3093 / gerraty@callan.com

The Center for Investment Training Educational Sessions

The Center for Investment Training, better known as the "Callan College," provides a foundation of knowledge for industry professionals who are involved in the investment decision-making process. It was founded in 1994 to provide clients and non-clients alike with basic- to intermediate-level instruction. Our next sessions are:

Introduction to Investments

San Francisco, July 24-25, 2018

Chicago, October 2-3, 2018

This program familiarizes fund sponsor trustees, staff, and asset management advisers with basic investment theory, terminology, and practices. It lasts one-and-a-half days and is designed for individuals who have less than two years of experience with asset-management oversight and/or support responsibilities. Tuition for the Introductory "Callan College" session is \$2,350 per person. Tuition includes instruction, all materials, breakfast and lunch on each day, and dinner on the first evening with the instructors.

Customized Sessions

The "Callan College" is equipped to customize a curriculum to meet the training and educational needs of a specific organization. These tailored sessions range from basic to advanced and can take place anywhere—even at your office.

Education: By the Numbers

525 Attendees (on average) of the Institute's annual National Conference

50+ Unique pieces of research the Institute generates each year

3,700 Total attendees of the "Callan College" since 1994

1980 Year the Callan Institute was founded

"Research is the foundation of all we do at Callan, and sharing our best thinking with the investment community is our way of helping to foster dialog to raise the bar across the industry."

Greg Allen, CEO and CRO

List of Callan's Investment Manager Clients

Confidential – For Callan Client Use Only

Callan takes its fiduciary and disclosure responsibilities to clients very seriously. We recognize that there are numerous potential conflicts of interest encountered in the investment consulting industry and that it is our responsibility to manage those conflicts effectively and in the best interest of our clients. At Callan, we employ a robust process to identify, manage, monitor and disclose potential conflicts on an on-going basis.

The list below is an important component of our conflicts management and disclosure process. It identifies those investment managers that pay Callan fees for educational, consulting, software, database or reporting products and services. We update the list quarterly because we believe that our fund sponsor clients should know the investment managers that do business with Callan, particularly those investment manager clients that the fund sponsor clients may be using or considering using. Please note that if an investment manager receives a product or service on a complimentary basis (e.g. attending and educational event), they are not included in the list below. Callan is committed to ensuring that we do not consider an investment manager's business relationship with Callan, or lack thereof, in performing evaluations for or making suggestions or recommendations to its other clients. Please refer to Callan's ADV Part 2A for a more detailed description of the services and products that Callan makes available to investment manager clients through our Institutional Consulting Group, Independent Adviser Group and Fund Sponsor Consulting Group. Due to the complex corporate and organizational ownership structures of many investment management firms, parent and affiliate firm relationships are not indicated on our list.

Fund sponsor clients may request a copy of the most currently available list at any time. Fund sponsor clients may also request specific information regarding the fees paid to Callan by particular fund manager clients. Per company policy, information requests regarding fees are handled exclusively by Callan's Compliance Department.
