DAV Service Officers will be available to assist with new claims, existing claims, and appeals on past claims—helping you navigate the VA system step by step.

A significant number of Police Officers, Firefighters, and First Responders are military veterans—yet many have never filed a disability claim or appealed a denied claim with the VA. To help bridge this gap, we've partnered with the Disabled American Veterans (DAV) organization to offer informational sessions focused on understanding VA benefits and the claims process for service-connected injuries and conditions. This program has proven successful in other cities, with Chicago serving as a model—where over 280 active police and fire personnel have successfully filed VA disability claims.
