INDEPENDENT AUDITORS' REPORT

To the Annuity and Pension Board of the Employes' Retirement System of the City of Milwaukee Milwaukee, Wisconsin

Report on Employer Schedules

We have audited the accompanying schedule of employer allocations of the Employes' Retirement System of the City of Milwaukee as of and for the year ended December 31, 2014, and the related notes. We have also audited the total for all entities of the columns titled beginning net pension liability (asset), ending net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense excluding that attributable to employer-paid member contributions (specified column totals) included in the accompanying schedule of pension amounts by employer of the Employes' Retirement System of the City of Milwaukee as of and for the year ended December 31, 2014, and the related notes.

Management's Responsibility for the Schedules

Management is responsible for the preparation and fair presentation of these schedules in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the schedules that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the schedule of employer allocations and an opinion on the specified column totals included in the schedule of pension amounts by employer based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, which is issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of employer allocations and specified column totals included in the schedule of pension amounts by employer are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the schedule of employer allocations and specified column totals included in the schedule of pension amounts by employer. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the schedule of employer allocations and specified column totals included in the schedule of pension amounts by employer, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the schedule of employer allocations and specified column totals included in the

schedule of pension amounts by employer in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the schedule of employer allocations and specified column totals included in the schedule of pension amounts by employer.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the schedules referred to above present fairly, in all material respects, the employer allocations and beginning net pension liability (asset), ending net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense excluding that attributable to employer-paid member contributions for the total of all participating entities for the Employes' Retirement System of the City of Milwaukee as of and for the year ended December 31, 2014, in accordance with accounting principles generally accepted in the United States of America.

Other Matter

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of United States, the financial statements of the Employes' Retirement System of the City of Milwaukee as of and for the year ended December 31, 2014, and our report thereon, dated June 16, 2015, expressed an unmodified opinion on those financial statements.

Restriction on Use

Our report is intended solely for the information and use of the Employes' Retirement System of the City of Milwaukee management, the Annuity and Pension Board, the Employes' Retirement System of the City of Milwaukee employers and their auditors and is not intended to be and should not be used by anyone other than these specified parties.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated June 16, 2015 on our consideration of the Retirement System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering Employes' Retirement System of the City of Milwaukee's internal control over financial reporting and compliance.

BAKAR TILLY VITRIHOW KRAUSE, CIV.

Milwaukee, Wisconsin November 30, 2015

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

Plan Description — The following brief description of the more common provisions of the Employes' Retirement System of the City of Milwaukee (the "Retirement System" or "ERS") is provided for financial statement purposes only. The provisions described reflect changes to the Retirement System enacted in 2000 as part of what is known as the Global Pension Settlement ("GPS"). GPS increased benefits to all members who consented to the settlement in exchange for allowing the City to make certain changes in plan administration, including allowing the use of Retirement System assets to pay for all costs to administer the Retirement System.

Plan Administration — The Retirement System was established pursuant to the Retirement Act (Chapter 396 of the Laws of Wisconsin of 1937) to provide the payment of retirement and other benefits to employees of the City of Milwaukee (the "City"). Chapter 441 of the Laws of Wisconsin of 1947 made the benefits contractual and vested. The Retirement System is a cost-sharing, multiple-employer plan, which also provides benefits to employees of the Milwaukee Metropolitan Sewerage District, Wisconsin Center District, Veolia Water Milwaukee LLC, Milwaukee Housing and Redevelopment Authorities, non-certified staff of Milwaukee Public Schools and some employees of the Milwaukee Area Technical College (the "Agencies"). City employees comprise approximately 56.8% of the active participants in the Retirement System.

Measurement Focus and Basis of Accounting — The ERS is accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, contributions are recognized in the accounting period in which the underlying earnings on which the contributions are based are paid and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the ERS. Investment transactions and the related gains and losses are recorded on a trade date basis. Dividend and interest income are accrued as earned. Investments are reported at fair value.

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer

(Dollar Amounts in Thousands)

Long-term Expected Rate of Return — The long term expected rate of return on pension plan investments was determined using Callan Associates' 10 year geometric capital market projections. Projected long term rates of return for each major asset class in the Retirement System's target asset allocation as of December 31, 2014, are summarized in the following table:

]	Long-term Expected
Asset Class	Policy	Actual	Rate of Return
Domestic Equity	28.0%	30.1%	7.60%
International Equity	20.0%	20.8%	7.80%
Global Equity	10.0%	7.1%	7.70%
Fixed Income/Cash	28.0%	26.8%	3.60%
Real Estate	7.0%	7.6%	8.00%
Private Equity	2.0%	2.4%	8.50%
Absolute Return	5.0%	5.2%	5.25%
	100.0%	100.0%	

Rate of Return — For the year ended December 31, 2014, the annual money-weighted rate of return, net of investment expense is shown below. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

	2014
Annual money-weighted rate of return,	
net of investment expense	5.17%

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

Actuarial Assumptions — The last actuarial valuation was performed as of January 1, 2014, and the amounts were used to roll-forward the total pension liability to the plan's year-end December 31, 2014, and was determined using the following actuarial assumptions, applied to all prior periods included in the measurement:

Valuation Date January 1, 2014

Actuarial Cost Method Entry Age Normal – Level Percentage of Pay

Amortization Method For pension expense; the difference between expected

and actual liability experience and changes of assumptions are amortized over the average of the expected remaining service lives of all members. The differences between projected and actual earnings are

amortized over a closed period of five years.

Asset Valuation Method Market Value

Actuarial Assumptions:

Investment Rate of Return 8.25% for calendar years through 2017, and 8.50%

beginning with calendar year 2018

Projected Salary Increases General City 3.0% - 7.5%

Police & Fire 3.0% - 14.4%

Inflation Assumption 3.00%

Cost of Living Adjustments Vary by Employe Group as explained in summary of plan

provisions

Mortality Table For regular retirees and for survivors, the RP-2000

Combined Mortality Table projected nine years using Scale AA. Future generational rates are projected from

2009 based on Scale AA. For duty and ordinary

disability retirees, use the RP-2000 Disability Mortality Table. For death in active service, the rates are similar to those used for regular retirees and survivors with a 6-

year setback.

Experience Study The actuarial assumptions used in December 31, 2014

valuation were based on the results of an actuarial experience study for the period January 1, 2007-

December 31, 2011.

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

Net Pension Liability — The components of the pension liability of the ERS as December 31, 2014, were as follows:

Total pension liability	\$	5,066,621
Plan fiduciary net position		(4,953,150)
Net pension liability	\$	113,471
	_	
Plan fiduciary net position as a		
percentage of total pension liability		97.76%
Covered employee payroll	\$	529,939
Net pension liability as a		
percentage of covered employee payroll		21.41%

Discount Rate — The discount rate used to measure the total pension liability was 8.49 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate and that contributions from ERS agencies will be made at contractually required rates, actuarially determined. Based on those assumptions, the ERS' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. The cross over analysis produces a single rate of 8.49 percent, which reflects the long-term expected rate of return on ERS investments. Therefore, the discount rate was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net pension liability (asset) to changes in the discount rate — The following presents the net pension liability (asset) of the ERS calculated using the discount rate of 8.49 percent, as well as what the ERS' net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (7.49 percent) or 1-percentage-point higher (9.49 percent) than the current rate:

	1	% Decrease	Cı	irrent Discount	1% Increase
	_	(7.49%)		(8.49%)	(9.49%)
ERS' net pension liability (asset)	\$	675,845	\$	113,471	\$ (360,259)

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

Schedule of Employer Allocations — The Employer Allocation Percentage is based on the employers required contribution compared to the required contribution for all employers. The Employer Allocation Percentage is rounded to seven decimal places.

Schedule of Pension Amounts — The employer's proportionate share of the Collective Net Pension Liability, Deferred Outflows of Resources, Deferred Inflows of Resources, and Total Employer Pension Expense (Income) is based on the Employer Allocation Percentage.

The Total Pension Liability is measured as of December 31, 2014 based on a January 1, 2014 actuarial valuation rolled forward to December 31, 2014 using standard roll-forward techniques as shown below:

Total pension liability		
Service cost	\$	69,693
Interest		409,899
Changes in benefit items		-
Differences between expected and actual experience		-
Changes of assumptions		-
Benefit payments including refunds of member contributions		(342,569)
Net change in total pension liability		137,023
Total pension liability - beginning		4,929,598
Total pension liability - ending	\$	5,066,621
Plan fiduciary net position		
Contributions - employer	\$	72,844
Contributions - member		43,663
Net investment income		238,985
Benefit payments, including refunds of member contributions		(342,569)
Administrative expense		(10,831)
Other		-
Net change in plan fiduciary net pension		2,092
Plan fiduciary net position - beginning		4,951,058
Plan fiduciary net position - ending	\$	4,953,150
-	_	
Net pension liability - ending	\$	113,471

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

The Fiduciary Net Position is 97.76% of the Total Pension Liability, so the ERS has a Net Pension Liability.

The Collective Deferred Inflows and Outflows of Resources due to liabilities are amortized over the Average Expected Service Lives of all Employees of 4.09 years. The Collective Deferred Inflows and Outflows of Resources due to the net difference between projected and actual earnings on pension plan investments is amortized over 5 years.

Collective Deferred Inflows and Outflows of Resources to be recognized in the Current Pension Expense are as follows:

		Outflows of Resources	Inflows of Resources			
Differences between expected and actual experience	\$	-	\$	-	\$	-
Net Difference between projected and						
actual earnings on pension plan investment		31,941		-		31,941
Total	\$_	31,941	\$		\$	31,941

Collective Deferred Inflows and Outflows of Resources to be recognized in the Future Pension Expense are as follows:

	Outflows of Resources	Inflows of Resources				
Differences between expected and actual experience	\$ -	\$	-	\$	-	
Net Difference between projected and actual earnings on pension plan investment	127,764		-		127,764	
Total	\$ 127,764	\$		\$	127,764	

Notes to the Schedules of Employer Allocations and Pension Amounts by Employer
As of and for the year ended December 31, 2014
(Dollar Amounts in Thousands)

Deferred Outflows and Inflows of Resources to be recognized in the Future Pension Expense are as follows:

Year Ending	Ne	Net Deferred Outflows					
December 31		of Resources					
2015	\$	31,941					
2016		31,941					
2017		31,941					
2018		31,941					
Total	\$	127,764					

Employers may also need to recognize a Deferred Outflow or Inflow of Resources related to a change in their proportionate share of the Net Pension Liability and for differences between employer contributions and proportionate share of contributions.

The Collective Pension Expense is determined as follows:

Service cost	\$ 69,693
Interest cost on total pension liability	409,899
Projected earnings on plan investments	(398,690)
Contributions - Member	(43,663)
Administrative expense	10,831
Plan changes	-
Recognition of net deferred outflows (inflows)	
Changes in assumptions	-
Differences between expected and actual liability experience	-
Difference between projected and actual earnings	31,941
Other changes in fiduciary net position	
Total Pension Expense	\$ 80,011
